

Nature's Cover-Ups

Earth to Student: When it is cold outside you wear a coat to stay warm, but how do the trees, animals and things in nature stay warm? List your ideas here. Can you draw pictures to illustrate your ideas?

Clues: What do bark, snow and fur protect? What does *hibernate* mean?

Earthy Idea: Can you take a tip from nature? When it is cold outside, what can you do so you can still save energy indoors?
